

I am writing to you today in support of our local K-Love Radio station, 90.7FM. I don't pretend to understand all the issues relating to LPFM, but I understand that the expansion of this service jeopardizes my listening to this radio station and I am very opposed to anything that would pre-empt my ability to turn on my car radio or my home stereo and listen to positive, encouraging music with a positive message not only for me but for the community that I live in. This radio station is public supported. It serves the public that supports it by offering music that is uplifting, messages that are informative and relevant to our daily lives, and on-air personalities that are real, and open about their personal faith. I have heard them stop and pray for a listener right on the air - and although they were praying for just one person, I am sure thousands if not tens of thousands were blessed by it. To replace this radio station or take away its ability to broadcast would be devastating to me and so many like myself who listen only to this type of radio. It fills our needs and there are far too few like it. K-Love is totally listener supported, it does not require a subsidy from the government. It is not committed to the pull of the almighty dollar. Its soul purpose is to encourage and build up those who listen. Please let it continue. I need it and so many others need it too. Respectfully,
Joyce Kirby
